

# SUSTAINABILITY SINCE 1899

## EASE – FROM RECYCLING TO SCREN SYSTEM

The forest and access to wood was one of the main factors when Edsbyn began in 1899. At an early date, we were economically (and ecologically) conscious of making the most of our raw materials. The Fanett Windsor chair, of which over 5 million were sold, was produced from waste wood from our ski manufacturing. Waste wood is today supplied to the power station and our wood comes from FSC approved forestry.

EASE, our latest screen system, is manufactured from recycled textiles and PET bottles (50/50). We still think about recycling, now as then.

Edsbyn was the first office furniture company approved for the Nordic Ecolabel, and our products are approved according to Möbelfakta. This confirms that our production and furniture fulfil the requirements set in terms of environment, quality and social responsibility.

Recycling is promoted by Edsbyns timelessly modern design that survives changes in fashion and high product quality that stands out over the entire life cycle. It enables reuse, which is in collaboration with our dealers.

At Edsbyn, we work constantly to improve our processes and furniture production – in order to be the obvious choice for those who select office furniture on the basis of environmental and sustainability factors.

### CERTIFIED PRODUCTION

Edsbyverken is certified according to quality and environmental management standards: ISO 9001 and ISO 14001.

### TMF SHOWS EASE IN AG:04

During Stockholm Furniture Fair 2017 TMF, The Swedish Federation of Wood and Furniture Industry will show Ease as a good example of sustainable product development on stand AG:04.

### CERTIFIED PRODUCTS

The majority of Edsbyn's products are certified according to Möbelfakta. This means: Technical quality standards for sustainability, stability and safety and for surface resistance.

The environmental standards primarily relate to raw materials and components used during manufacture, while the product standards relate to the completed item of furniture.

Producers and subcontractors undertake systematic occupational health and safety work and comply with current occupational health and safety legislation according to FN:s »Code of Conduct«.

### THE NORDIC ECOLABEL

Edsbyn was the first manufacturer of office furniture to be Nordic Ecolabelled.

Our latest example of a Nordic Ecolabelled product is the EASE screen system which is manufactured from a material normally used for sound absorption in vehicles. It consists of recycled textiles and PET bottles, which makes EASE a good example of sustainable product development.

### EASE – RECYCLED MATERIAL

Soundfelt*	100%
Studs, MDF	70%
Steel	25%
Connection, PA plastic	0%
Upholstery	0%
* Soundfelt consists of recycled PET and textile (50/50).	

### EASE – RECYCLABLE

Soundfelt	100%
Studs, MDF	100%
Steel	100%
Connection, PA plastic	100%
Upholstery	100%

### EASE – RENEWABLE

Upholstery, wool	100%
Studs, MDF	100%
