

TILT TABLE

THE NEW GENERATION SIT 'N' STAND

SIT, STAND & TILT

THE NEW GENERATION SIT 'N' STAND

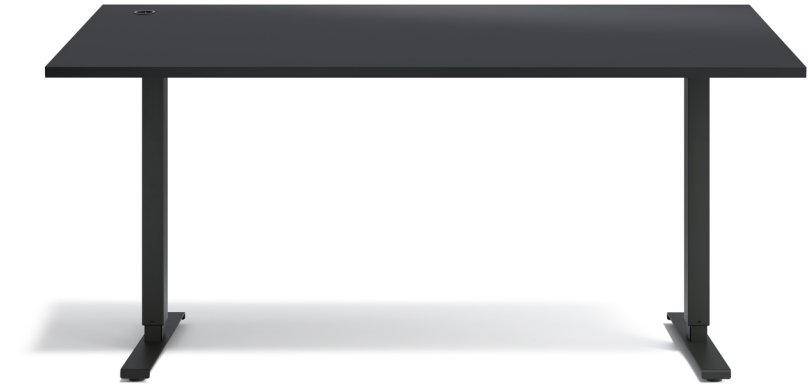

The Tilt Table is the next generation in height-adjustable tables that also offers a third working position.

The table top can be angled up to 15 degrees using a simple hand grip, providing welcome relief for both the back and neck.

Tilt Table is an excellent touchdown table in the modern activity-based office and it works equally well as a comfortable drawing table in the studio, or a flexible work desk in the school room.

Our modern work spaces and education facilities are in need of more ergonomically sound options for the health of our bodies. Tilt Table has the aesthetics of the classic table, can be configured according to your own wishes and comes with three functions
- Sit, Stand and Tilt.

The first prototype of Tilt Table was shown 2018 at Stockholm Furniture and Light Fair 2018 with very positive response. Now we launch Tilt Table as a fully developed product ready to order!

REBECKA ULLHOLM

ERGONOMIC SPECIALIST & LICENSED PERSONAL TRAINER

Rebecka Ullholm is an Ergonomic Specialist with many years experience in ergonomics and adaptation of work environments. Rebecka has a Biomedicine education with a focus on Ergonomics and Work Environment and she has worked as an Ergonomic Specialist since 2009.

Edsbyn asked Rebecka Ullholm for a professional statement regarding Tilt Table:
– Above all, we need to be able to offer more and varied work positions at the office.

”The best working position is the next working position”

She continues:
– The activity-based office does not have the same possibility of using ergonomic accessories. In those offices, Tilt Table can actually offer something extra.

We develop our products with a clear vision
to add value for the human being.

Tilt Table is the new generation in Sit 'n' Stand
that also offers a third working position.
