

RESOLVE PLAY

DESIGN DAN IHREBORN

Create a room in the room with Resolve Play Sofa and Armchar. Put two sofas together and make a small conference room by adding an AV-prepared partition wall. The key is that the edges of both the partition wall and the sofas can be connected using Velcro.

The sofa has thin legs. The legs run up into the back and meet a clear “waist”, which gives the sofa a light, elegant appearance.

Resolve Play can be clad in a number of fabrics and variants, including with different fabrics on the frame, seat and cushions.
