

ACCESS RECYCLING UNIT

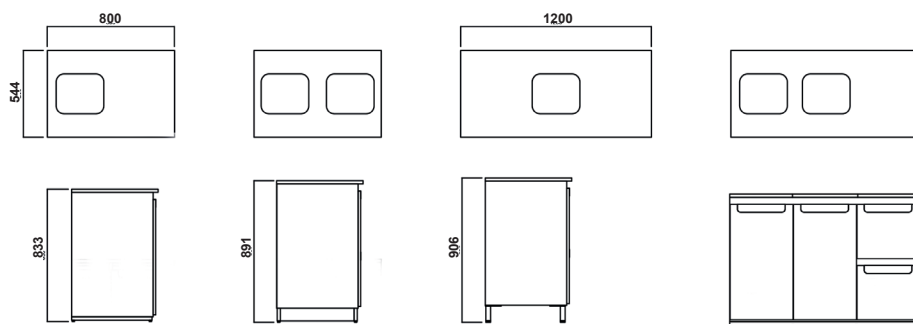

DESIGN BY EDSBYN

A practical recycling unit in a stylish design, with handles in lacquered steel. It is part of the Access series where function and choice are the focus. In response to today's needs for efficient solutions for workplaces, Edsbyn has developed practical recycling unit. You can choose between colours white, light grey and dark grey. The top board is plywood and have a surface layer in HPL (high pressure laminate). The unit has a depth of 544 mm. The container holds about 93 liters and fits with garbage bags of 125 liters.
