## Design Mario Ruiz

EDSBYN

This is a universal seating furniture that consists of three sofa modules in different shapes. Add a backrest and create countless combinations to fit any need and space, from the small lobby to the large meeting area.

Mario Ruiz

Mario Ruiz studied industrial design at Elisava Facultat de Disseny e Ingenieria de Barcelona where he also has been serving as a professor. Ruiz opened his studio in Barcelona in 1995 and has since worked internationally in multidisciplinary design projects. Ruiz's work in industrial, graphic and furniture design has earned him several prestigious awards.

Projects for several global producers has also specifically highlighted his skills in designing system and office furniture. In 2016 Mario Ruiz received the foremost design award in Spain, Premio Nacional de Diseo, which is given by the State and the King of Spain Felipe VI.

“Sustainability is integrated as a natural part in the production.”

Mario Ruiz

"It is wonderful to be a part of a project in a company that has such a long history of furniture design as Edsbyn, and which is also just in the beginning of a new chapter. There is

a high quality in the production and in the materials. Another thing that we appreciate in our collaboration is the fact that we never have to stress the aspect of sustainability, it is already

understood and integrated as a natural part of the production."  
/Mario Ruiz

A universal seating  
furniture that allows  
you to create big or  
small islands.

Escape Sofa

Add a backrest and  
create countless  
combinations.

Escape Sofa

Escape is a system of different modules that allows you to create big or small islands. They are designed to offer a retreat for people that want to relax, to contemplate away from the stress and movements in a busy environment. What might look like

simple shapes are in fact the hardest to achieve so that they work both technically and aesthetically. These modules are square and rectangular with soft, round curves, almost like stones or pebbles found in a river and the combinations you can

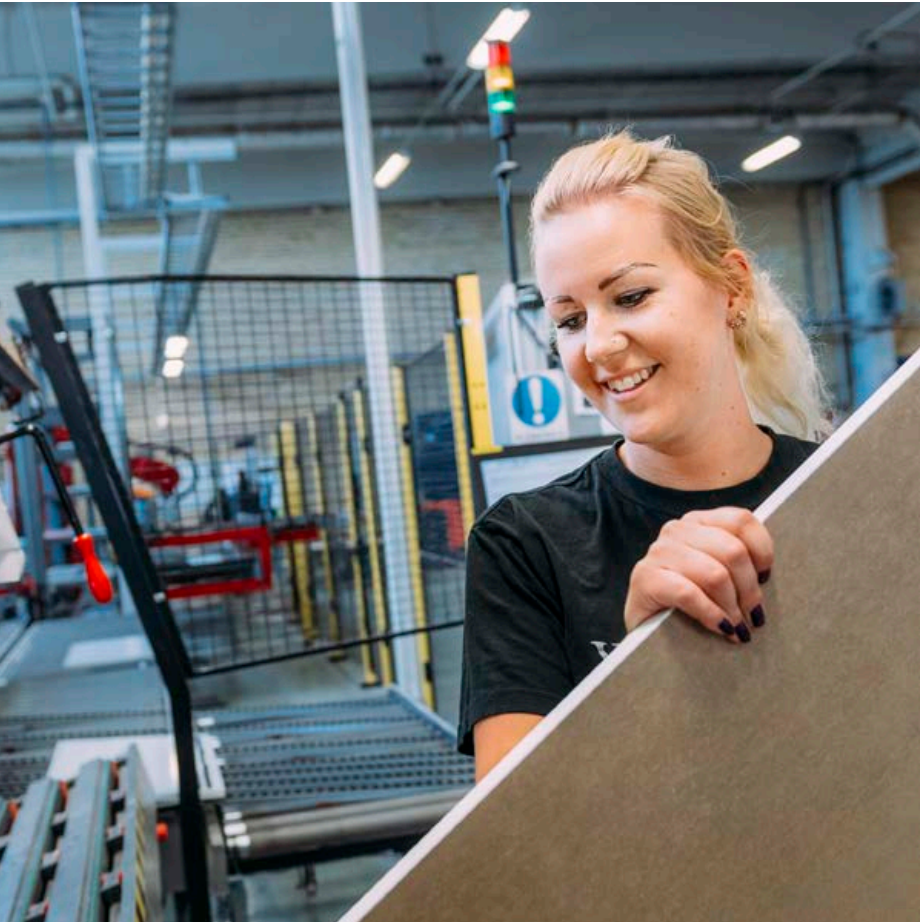

create are countless. From basic to extensive, Escape can stretch out into a corridor and fill up a great hall or be scaled down into a small waiting area, connecting different interior zones in a work or meeting space.

# Sustainability

Edsbyn strives to be your natural choice when making furniture selections while considering sustainability and care for the environment. We are constantly working to improve our production processes and carefully select all of the raw materials we use.

### ISO Certified Production

Edsbyverken is certified according to quality and environmental management standards ISO 9001 and ISO 14001. We expect materials from our suppliers to fulfil the criteria for environmental certification – and we require our suppliers to accept ethical and social responsibility, just like Edsbyn does.

**ISO 14001 – Environmental Management System**  
An EMS according to ISO 14001 is a systematic and structured approach for all types of organizations to reduce environmental impact, and used in the right way it also supports continuous improvements for the business.

**ISO 9001 – Quality Management System**  
The QMS is a tool to reach continuous improvements and adjust the business to meet customers needs. It includes everything from how you meet your customers needs to avoiding malfunctions.

### Certified Products

Certified according to Möbelfakta means: Technical quality standards for sustainability, stability, safety and for surface resistance.

Environmental standards for materials and products. The environmental standards primarily relate to raw materials and components used during manufacturing, while the product standards relate to the completed item of furniture.

Producers and subcontractors undertake systematic occupational health and safety work and comply with current occupational health and safety legislation.

All materials and surface treatments used for Escape are approved for public environments with high wear and tear, and will last for many years without the need for maintenance.

# Climate-Smart

## Holder for back and table

Steel – Manufactured and powder-coated by a local supplier in Edsbyn. The stand, U-brackets, and the accompanying table are detachable, allowing for the replacement of parts and renovations to extend the product's lifespan.

## Frame

The frame is manufactured and assembled on-site at our factory in Edsbyn using MDF and chipboard, which is mainly composed of recycled materials, and plywood.

## Table top

Manufactured on-site at our factory in Edsbyn with a plywood core and a surface in veneer and HPL as per Color & Trim.

## Upholstery

Several sustainable options are available for upholstery by choosing from Edsbyn's "Color & Trim", which include a range of recycled and natural materials. The textiles have various certifications, such as Ecolabel, OEKO-tex, and sometimes EPD.

Escape is upholstered in Edsbyn and we are able to help with future repairing and replacement to extend the lifespan of the products.

# Elevating Spaces since 1899

## Edsbyn Factory

The secret of our success is the ability to change and adapt.

What began in 1899 as a small Joinery Workshop in the community of Edsbyn, grew into one of the largest furniture factories in the Nordics, and over the years our work has been characterised by progressive endeavours.

Between 1934–1984 we produced wooden skis for the Ministry of Defence, Olympic gold winners and families. Out of the waste material we manufactured

windsor chairs, which quickly became a classic and a staple in Swedish homes.

For many years we operated Sweden's first plywood factory and mastered the technique of form-pressed wood. This contributed to the innovative veneer seat for the wooden chair Fanett (1955), which became widely recognised through the collaboration with the Finnish designer Ilmari Tapiovaara.

These modules are square and rectangular with soft, round curves, almost like stones or pebbles found in a river and the combinations you can make with them are countless.  
/Mario Ruiz

Customized furniture with extensive configuration possibilities is our specialty. Color & Trim displays a small selection of the color schemes our selected textiles and materials offer as standard orders. All materials are carefully selected with environmental and sustainability as our top priority.

**Fabric**

A thorough and extensive selection of textiles sourced from most trusted providers in terms of sustainability and the environment.

**Leather**

Semi-aniline Leather – Soft, pliable and free of chrome. Exceptional comfort and impressive durability highly suitable for public spaces.

**Finish**

All the finishes that we offer in Color & Trim are sustainable and suitable for environments with heavy daily wear and tear.

# Color & Trim

# Possible to choose wide, easy to choose wise.

# Fabrics

A selection of fabrics; more colors are available to choose from at [my.edsyn.com](https://my.edsyn.com). More detailed information can be found on the suppliers' websites. Alternative textiles are offered as a custom order.
