Troy

Troy Trolley

Design Mario Ruiz

EDSBYN

Troy is a trolley that will extend the offer of any room. With a calm form pressed wooden front, a technique that Edsbyn has mastered for over 100 years, Troy gently blends in with the interior while simultaneously being open for service.

Mario Ruiz

Mario Ruiz studied industrial design at Elisava Facultat de Disseny e Ingenieria de Barcelona where he also has been serving as a professor. Ruiz opened his studio in Barcelona in 1995 and has since worked internationally in multidisciplinary design projects. Ruiz's work in industrial, graphic and furniture design has earned him several prestigious awards.

Projects for several global producers has also specifically highlighted his skills in designing system and office furniture. In 2016 Mario Ruiz received the foremost design award in Spain, Premio Nacional de Diseo, which is given by the State and the King of Spain Felipe VI.

“A trolley needs to be more than just shelves on wheels”

“Today we live, work and socialise in the same space, so the way we use furniture changes throughout the day. In these “hybrid spaces” furniture is expected to be flexible, so a trolley needs to be more than just shelves on wheels. Everyone can relate to the feeling of being in a meeting in which

a trolley comes in with refreshments and, for a second, the conversation stops and no one can take their mind off the cake. With one side closed, Troy enters the room anonymously and discretely parks to become part of the interior architecture. When turned around the goods can be

enjoyed, and when turned back the dishes are covered up. I am very happy with the result, I think we have managed to get the radii just right in every corner for a welcoming, friendly piece.” /Mario Ruiz

Strong aesthetics
and function have
been perfected
together.

Troy Trolley

Troy Trolley

Troy is a trolley that will extend the offer of any room. With a calm form pressed wooden front, a technique that Edsbyn has mastered for over 100 years, Troy gently blends in with the interior while simultaneously being open for service. Looking back

in history at a long line of trollies, emphasis has traditionally been placed either on strong aesthetics or function, but in Troy these two aspects have been perfected

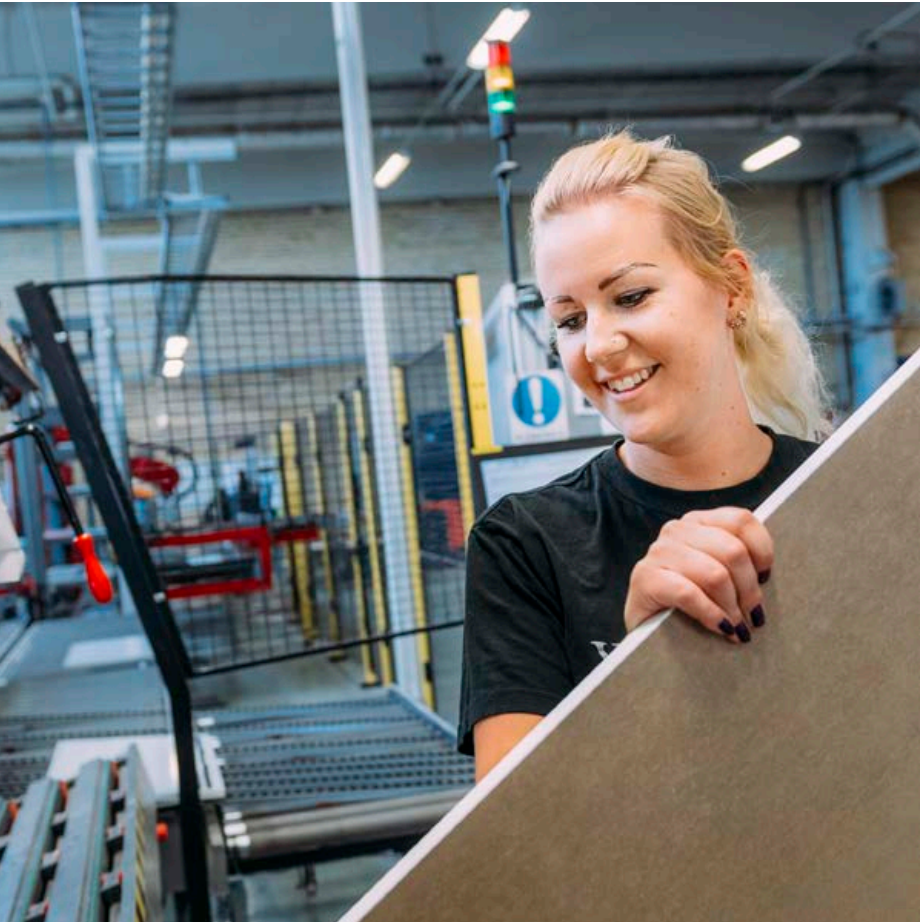

together. And with a high podium size version, Troy can also accommodate planned or spontaneous talks

Sustainability

Edsbyn strives to be your natural choice when making furniture selections while considering sustainability and care for the environment. We are constantly working to improve our production processes and carefully select all of the raw materials we use.

ISO Certified Production

Edsbyverken is certified according to quality and environmental management standards ISO 9001 and ISO 14001. We expect materials from our suppliers to fulfil the criteria for environmental certification – and we require our suppliers to accept ethical and social responsibility, just like Edsbyn does.

ISO 14001 – Environmental Management System
An EMS according to ISO 14001 is a systematic and structured approach for all types of organizations to reduce environmental impact, and used in the right way it also supports continuous improvements for the business.

ISO 9001 – Quality Management System
The QMS is a tool to reach continuous improvements and adjust the business to meet customers needs. It includes everything from how you meet your customers needs to avoiding malfunctions.

Certified Products

Certified according to Möbelfakta means: Technical quality standards for sustainability, stability, safety and for surface resistance.

Environmental standards for materials and products. The environmental standards primarily relate to raw materials and components used during manufacturing, while the product standards relate to the completed item of furniture.

Producers and subcontractors undertake systematic occupational health and safety work and comply with current occupational health and safety legislation.

All materials and surface treatments used for Troy are approved for public environments with high wear and tear, and will last for many years without the need for maintenance.

Climate-Smart

Base
The parts are made from swedish steel, and approximately 30% of the steel is recycled material. All these parts are manufactured, and powder coated by a local supplier in Edsbyn. It is possible to disassemble and exchange or refurbish the base.

Body
Molded birch veneer with oak or ash as outer layer, manufactured in Sweden. The body is demountable, allowing for the replacement of parts and renovation to extend the product's lifespan, which enables to exchange or repair different parts of Troy.

Handle
The handle is made of solid ash or oak and can easily be renovated.

Elevating Spaces since 1899

Edsbyn Factory

The secret of our success is the ability to change and adapt.

What began in 1899 as a small Joinery Workshop in the community of Edsbyn, grew into one of the largest furniture factories in the Nordics, and over the years our work has been characterised by progressive endeavours.

Between 1934–1984 we produced wooden skis for the Ministry of Defence, Olympic gold winners and families. Out of the waste material we manufactured

windsor chairs, which quickly became a classic and a staple in Swedish homes.

For many years we operated Sweden's first plywood factory and mastered the technique of form-pressed wood. This contributed to the innovative veneer seat for the wooden chair Fanett (1955), which became widely recognised through the collaboration with the Finnish designer Ilmari Tapiovaara.

“The pandemic has profoundly changed the workspace. A new comfort, with multipurpose and flexible pieces, is at the heart of a new office landscape arising from the way users understand the workplace.

This trolley is not a new typology, but it is a coherent and contemporary answer to a new way of understanding the office. A very friendly design for a flexible and multipurpose object” /Mario Ruiz

A close-up photograph of a wooden desk. A black leather strap is wrapped around the desk, and a black handle is visible on the right side. The wood has a natural grain pattern.

Modularity

“A response to a new way of understanding the workspace”
