DESIGN
J E N S   F A G E R

A family of chairs for any space, with a focus on comfort and personality.

DESIGN PROCESS
It has taken us countless hours to study the function and develop this chair series together with Jens, which is modular almost to infinity, 100% circular, and at the same time functional, comfortable, elegant, and high-quality.

FOCUS ON COMFORT
The focus has been on comfort and user-friendliness throughout the design process. The result is the double-curved surfaces in both the seat and back. A Modular Chair is comfortable even in its simplest form, entirely made of wood. Add a upholstered seat and back for a softer impression and even higher comfort.

MODULAR FOR THE FUTURE
We are proud to present a complete series of chairs that are 100% circular. All parts can be disassembled for restoration or recycling.

BALANCE
The balance between the floating backrest, the seat with its thin outer contours, and the elegant steel tube frames gives the Modular Chair a clear international expression with a unique and strong identity.

POSSIBILITIES
Simple variables, together with endless possibilities, create conditions for those who want to make a strong and sustainable impression with their interior design. From the conference room, meeting room, class room, café, restaurant to the hotel lobby. The Modular Chairs are designed for everyday life, in every room.

DESIGN
The Modular Chair is designed by Jens Fager for use everyday life, with a strong focus on its comfort. Coupled a strong design identity and international approach, modular chair has been created.

JENS FAGER
One of Sweden's most well-established designers. A graduate from Konstfack University in Stockholm, he has made an international impact with exhibitions in London, Milan and Stockholm.

SUSTAINABILITY

A GUIDING PRINCIPLE

Edsbyn strives to be your natural choice when making furniture selections while considering sustainability and care for the environment. We are constantly working to improve our production processes and carefully select all of the raw materials we use.

ISO CERTIFIED PRODUCTION

Edsbyverken is certified according to quality and environmental management standards ISO 9001 and ISO 14001. We expect materials from our suppliers to fulfil the criteria for environmental certification – and we require our suppliers to accept ethical and social responsibility, just like Edsbyn does.

ISO 9001 – Quality Management System
The QMS is a tool to reach continuous improvments and adjust the business to meet customers needs. It includes everything from how you meet your customers needs to avoiding malfunctions.

ISO 14001 – Environmental Management System
An EMS according to ISO 14001 is a systematic and structured approach for all types of organizations to reduce environmental impact, and used in the right way it also supports continuous improvments for the business.

MÓBELFAKTA

CERTIFIED PRODUCTS

Certified according to Möbelfakta means:
Technical quality standards for sustainability, stability and safety and for surface resistance.

Environmental standards for materials and products. The environmental standards primarily relate to raw materials and components used during manufacture, while the product standards relate to the completed item of furniture.

Producers and subcontractors undertake systematic occupational health and safety work and comply with current occupational health and safety legislation.

CIRCULAR

MORE THAN RECYCLING

All materials and surface treatments used for Modular Chairs are approved for public environments with high wear and tear, and will last for many years without the need for maintenance.

REFURBISH

Seat and backrests are easy to remove for reupholstering. Edsbyn offers a repair and replacement service for refurbishing.

REMOVE & SORT

During development of Modular Chairs we have made sure to create a design that makes it possible for each component to be removed and sorted wich makes it circular.

REPAIR

Edsbyn is able to help with future repairing and replacement of separate parts.

RETHINK

To rethink has an even greater positive impact on our environment than recycling at the end of the products' useful life. Therefore, we have created a chair with endless possibilities to rethink, rebuild and reuse.

REUSE

All materials and surface treatments are approved for public environments with high wear.
The Modular Chairs will last for use and reuse in many years without the need for maintenance.

RELOCATE

It's even simple with Modular Chairs to disassemble for transport when it's time to relocate or pass the chair on to the next user.

RECYCLED PLASTIC

100%
The optional glides are chair components made of 100% recyclable materials

RECYCLED SEAQUAL FABRIC

100%
Edsbyn are proud to present our first 100% recycled fabric – QUEST from camira.

A recycled polyester fabric containing SEAQUAL yarn, made from plastic waste taken from the oceans.

RECYCLABLED METAL

100%
Chair components in the base for 5-star Swivel are made with 100% recyclabled materials

45%
Steel on average, used on the four legged chairs and arm loop, is from 45% recycled steel.

MODULARITY

"The Modular series has no end, the possibilities to build your own dream chair for your project are endless"

/Jens Fager
