Everlong

Everlong Sofa

Design Jens Fager

EDSBYN

The length of the Everlong Sofa can be adjusted to meet the visions of architects and the need for unique solutions. A backrest with an optimal angle and a generous seat guarantees comfort. Thanks to its straightforward design, it can easily fit into a wide range of demanding settings, including restaurants, airports, or museums.

After studies at Tohoku University of Art and Design (JP) Jens Fager took his Masters degree in interior architecture and furniture design at Konstfack – University of Arts, Crafts and Design in Stockholm, 2008.

Fager's studio is based in southern Sweden and has assignments in furniture and product design, art direction and interiors for Swedish and international producers.

Designs by Fager are represented in collections such as Röhsska Museet – Museum of Design and Craft in Gothenburg, Stedelijk Museum Amsterdam, and Nationalmuseum – Sweden's Museum of Art and Design.

Jens Fager

“What matters the most to me in a furniture like Everlong is the comfort”

“The feeling for quality and materials are almost ingrained in the factory walls”

I have collaborated with Edsbyn since 2011 and my experience is that it is a company that architects are genuinely interested in. The factory itself has a long history but is at the same time state of the art – their whole production flow has been perfected and they are very strong on offering bespoke solutions. The people working at Edsbyn are amazing, and the feeling for quality

and materials are almost ingrained in the factory walls, many generations have worked there and carried on the legacy. Just to be able to collaborate with a person who's parent in turn has been part of developing the pin-back chair Fanett (1950), and also worked with Finnish designer Ilmari Tapiovaara, is an experience in itself.
/Jens Fager

A close-up, partial view of the backrest of a blue sofa. The backrest is upholstered in a dark blue fabric with a fine, woven texture. It is supported by a single, thick, dark blue cylindrical leg. The text "Everlong Sofa" is printed in white on the lower left portion of the backrest.

Everlong Sofa

Guaranteed comfort with a backrest in an optimal angle and a generous seat.

Everlong Sofa

The length of the Everlong sofa can be adjusted to meet the architect's vision and the need for unique solutions. Much design focus has been placed on the harmony in the leg frame's meeting with the back and seat, which also makes the Everlong Sofa beautiful as a standalone piece in a room. With its honest design, it can be easily positioned in a wide variety of demanding environments, such as restaurants, airports, or museums.

Besides from bespoke lengths, Everlong is available in two standard versions and can also be arranged with backrests back-to-back down the centre.

"For Edsbyn, Everlong is a new type of sofa that is developed to offer clients the possibility to order it in a specific length based on their need. What matters the most to me in a furniture like this is the comfort. The pressure point on the lumbar region is almost the same for everyone,

no matter how tall we are, and so it is important that the backrest is adjusted as accurately as possible to not put any unnecessary strain on it. And we have developed a quite generous upholstered backrest in what we consider is an optimal angle. Everlong has an honest, clear and open structure that makes it easy to picture in a wide variety of environments. I am very satisfied

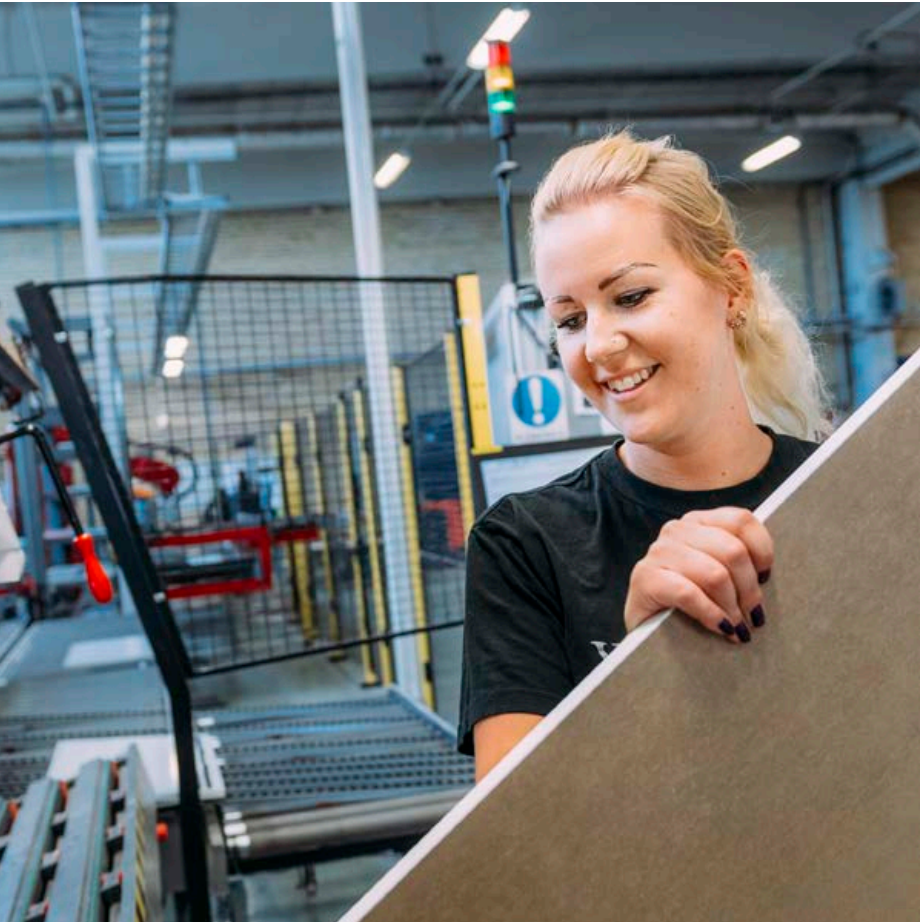

with the fact that we have used the machines in the best possible ways so that we want to highlight all the details of the metal work instead of covering them up with a fabric."
/Jens Fager

Sustainability

Edsbyn strives to be your natural choice when making furniture selections while considering sustainability and care for the environment. We are constantly working to improve our production processes and carefully select all of the raw materials we use.

ISO Certified Production

Edsbyverken is certified according to quality and environmental management standards ISO 9001 and ISO 14001. We expect materials from our suppliers to fulfil the criteria for environmental certification – and we require our suppliers to accept ethical and social responsibility, just like Edsbyn does.

ISO 14001 – Environmental Management System
An EMS according to ISO 14001 is a systematic and structured approach for all types of organizations to reduce environmental impact, and used in the right way it also supports continuous improvements for the business.

ISO 9001 – Quality Management System
The QMS is a tool to reach continuous improvements and adjust the business to meet customers needs. It includes everything from how you meet your customers needs to avoiding malfunctions.

Certified Products

Certified according to Möbelfakta means: Technical quality standards for sustainability, stability, safety and for surface resistance.

Environmental standards for materials and products. The environmental standards primarily relate to raw materials and components used during manufacturing, while the product standards relate to the completed item of furniture.

Producers and subcontractors undertake systematic occupational health and safety work and comply with current occupational health and safety legislation.

All materials and surface treatments used for Everlong are approved for public environments with high wear and tear, and will last for many years without the need for maintenance.

Climate-Smart

Legs and rails

Manufactured and powder-coated by a supplier in Europe. The supplier began operations in 2001 and is certified according to ISO 9001:2015 for quality and ISO 14001:2015 for the environment. Production uses electricity sourced 100% from renewable sources. The steel is made of approximately 70% virgin material and 30% recycled material.

Legs and frames/brackets for the sofa are detachable, allowing for part replacement and refurbishment to extend the product’s lifespan.

Upholstery

Several sustainable options are available for upholstery by choosing from Edsbyn’s “Color & Trim”.

Seat cushions and backrests are manufactured by a supplier in Sweden and consist of cold foam certified according to Oeko-tex standard 100.

Everlong is upholstered in Edsbyn and we are able to help with future repairing and replacement to extend the lifespan of the sofa.

Frame

The frame is made of MDF and plywood.

Elevating Spaces since 1899

Edsbyn Factory

The secret of our success is the ability to change and adapt.

What began in 1899 as a small Joinery Workshop in the community of Edsbyn, grew into one of the largest furniture factories in the Nordics, and over the years our work has been characterised by progressive endeavours.

Between 1934–1984 we produced wooden skis for the Ministry of Defence, Olympic gold winners and families. Out of the waste material we manufactured

windsor chairs, which quickly became a classic and a staple in Swedish homes.

For many years we operated Sweden's first plywood factory and mastered the technique of form-pressed wood. This contributed to the innovative veneer seat for the wooden chair Fanett (1955), which became widely recognised through the collaboration with the Finnish designer Ilmari Tapiovaara.

For Edsbyn, Everlong is a new type of sofa that is developed to offer clients the possibility to order in a specific length based on their needs.

Modularity

Besides from bespoke lengths, Everlong is available in two standard versions and can also be arranged with backrests back-to-back down the centre.

Adjust the length of the sofa to meet the unique needs of the space.

Color & Trim

Customized furniture with extensive configuration possibilities is our specialty. Color & Trim displays a small selection of the color schemes our selected textiles and materials offer as standard orders. All materials are carefully selected with environmental and sustainability as our top priority.

Fabric
A thorough and extensive selection of textiles sourced from most trusted providers in terms of sustainability and the environment.

Leather
Semi-aniline Leather – Soft, pliable and free of chrome. Exceptional comfort and impressive durability highly suitable for public spaces.

Finish
All the finishes that we offer in Color & Trim are sustainable and suitable for environments with heavy daily wear and tear.

Possible to choose wide,
easy to choose wise.

Fabrics

A selection of fabrics; more colors are available to choose from at my.edsyn.com. More detailed information can be found on the suppliers' websites. Alternative textiles are offered as a custom order.
