

EDSBYN

Eski

Edsbyn's rich history of manufacturing has come alive in the Eski Chair. The silhouette of the famous windsor chair Fanett is recognisable in the stitching of the upholstered seat – a seat made of new biomass foam which only lowers the environmental footprint, not the comfort.

Luca Nichetto graduated in industrial design at Istituto Universitario di Architettura di Venezia (IUAV) 1998, and worked at classic Italian companies like Salviati and Foscari before founding his studio in the hometown of Venice in 2006. The studio grew fast through international assignments for producers, and in

2011 a second studio was established in Stockholm. Besides from furniture- and product design, the studio also have made widely publicised interiors. In 2022 the first comprehensive monograph on Luca Nichetto was published by Phaidon.

Luca Nichetto

“Appreciation for furniture that goes beyond sheer functionality”

Luca Nichetto

“We developed Eski in different versions, featuring four legs and a swivel base.

Over the years I have worked with several heritage brands, respectfully exploring their historical archives to find products that contributed to their success. With

Edsbyn, I found the version of the Fanett (1955) chair designed by Finnish designer Ilmari Tapiovaara, an icon in Scandinavian design history. This beautiful windsor chair can still be found across Sweden. So when I was asked to design an easy chair, I wanted to make it as

ergonomic and elegant as possible, adding a small twist. I have used the recognisable angles of the windsor chair as a stitching pattern in the upholstered seat, symbolically linking the company's past with its evolving future.” /Luca Nichetto

The silhouette of the famous windsor chair Fanett is recognisable in the stitching of the upholstered seat, Edsbyn's rich history of manufacturing has come alive.

Eski Chair

Sustainability

Edsbyn strives to be your natural choice when making furniture selections while considering sustainability and care for the environment. We are constantly working to improve our production processes and carefully select all of the raw materials we use.

ISO Certified Production

Edsbyverken is certified according to quality and environmental management standards ISO 9001 and ISO 14001. We expect materials from our suppliers to fulfil the criteria for environmental certification – and we require our suppliers to accept ethical and social responsibility, just like Edsbyn does.

ISO 14001 – Environmental Management System
An EMS according to ISO 14001 is a systematic and structured approach for all types of organizations to reduce environmental impact, and used in the right way it also supports continuous improvements for the business.

ISO 9001 – Quality Management System
The QMS is a tool to reach continuous improvements and adjust the business to meet customers needs. It includes everything from how you meet your customers needs to avoiding malfunctions.

Certified Products

Certified according to Möbelfakta means: Technical quality standards for sustainability, stability, safety and for surface resistance.

Environmental standards for materials and products. The environmental standards primarily relate to raw materials and components used during manufacturing, while the product standards relate to the completed item of furniture.

Producers and subcontractors undertake systematic occupational health and safety work and comply with current occupational health and safety legislation.

All materials and surface treatments used for Eski are approved for public environments with high wear and tear, and will last for many years without the need for maintenance.

Climate-Smart

Base 4-Legged & 4-Star Column
Swedish steel, with approximately 30% of the steel being recycled material. The base is manufactured and powder coated by a local supplier in Edsbyn. It is possible to disassemble, exchange, or refurbish it.

Base 4-Star Swivel
100% recycled aluminum. It is possible to disassemble, exchange, or refurbish it.

Seat
The seat is molded foam and consists of polyurethane and steelwire. Usually, molded foam is based on fossil materials, but our supplier of the molded seat uses foam that is based on biomass.

Fabrics
Edsbyn offers a wide range of fabrics as standard. There are many options if you want fabrics with recycled materials or natural materials. Among the fabrics that Edsbyn offers there are several options that are certified to Ecolabel or OEKO-tex. The certificates guarantee that the fabric is manufactured in a sustainable way.

Elevating Spaces since 1899

Edsbyn Factory

The secret of our success is the ability to change and adapt.

What began in 1899 as a small Joinery Workshop in the community of Edsbyn, grew into one of the largest furniture factories in the Nordics, and over the years our work has been characterised by progressive endeavours.

Between 1934–1984 we produced wooden skis for the Ministry of Defence, Olympic gold winners and families. Out of the waste material we manufactured

windsor chairs, which quickly became a classic and a staple in Swedish homes.

For many years we operated Sweden's first plywood factory and mastered the technique of form-pressed wood. This contributed to the innovative veneer seat for the wooden chair Fanett (1955), which became widely recognised through the collaboration with the Finnish designer Ilmari Tapiovaara.

Ergonomic and elegant
with a small twist.

Color & Trim

Customized furniture with extensive configuration possibilities is our specialty. Color & Trim displays a small selection of the color schemes our selected textiles and materials offer as standard orders. All materials are carefully selected with environmental and sustainability as our top priority.

Fabric

A thorough and extensive selection of textiles sourced from most trusted providers in terms of sustainability and the environment.

Leather

Semi-aniline Leather – Soft, pliable and free of chrome. Exceptional comfort and impressive durability highly suitable for public spaces.

Finish

All the finishes that we offer in Color & Trim are sustainable and suitable for environments with heavy daily wear and tear.

Possible to choose wide, easy to choose wise.

Fabrics

A selection of fabrics; more colors are available to choose from at my.edsbym.com. More detailed information can be found on the suppliers' websites. Alternative textiles are offered as a custom order.
